High Pressure Injector - Long Distance Sprayer (X-Jet)

"Original Version"

"New - M5" Version"

- ◆ There are two versions of the X-Jet available. You decide what version is right for you! The "Original" version and the "M5" version have all the same features except that the New "M5" version comes with a variable nozzle at the outlet of the nozzle. The variable nozzle allows for a 0-60 Degree Fan pattern. The "M5" version is to be used on jobs where the zero degree impact of the "Original" version is not required.
- ◆ The stainless steel nozzle injects and proportions soaps, chemicals, and liquids at high or low pressure without going through your pump, hose, or gun. The X-Jet nozzle projects chemicals or other liquids to vertical heights of up to **40 feet** or more, depending on water volume! It can be used with hot or cold pressure washers from 1000 PSI to 6000 PSI. The X-Jet nozzle is the preferred method of roof cleaning chemical application and can be used to wash and rinse any surface which would normally require the use of ladders or lifting devices.
- ◆ **Applications:**
Wash and remove mold, dirt and mildew from houses, buildings, water tanks, silos and roof tops without using ladders or scaffolds. The X-Jet is **great for acid washing!**
- ◆ **Kit includes:** X-Jet nozzle, Close range nozzle (not included on M5 version), 15' hose, inline shut off valve, 14 color coded proportioners, and a 4 page instructional brochure.
